

Graphing Sine Function

May 13

PROPERTIES  $f(x) = \sin x$

$D = \{x \in \mathbb{R}\}$  PERIOD =  $360^\circ$

$R = \{y \in \mathbb{R} / -1 \leq y \leq 1\}$  AXIS = 0

AMPLITUDE = 1

ex. a)  $y = 3 \sin(2x) + 1$  (a) PERIOD =  $\frac{360}{k}$

(b)  $y = 4 \cos(0.5x) - 2$  (b)

AMPLITUDE	3	4
PERIOD	$180^\circ$	$720^\circ$
AXIS	$y = 1$	$y = -2$

ex.  $h(t) = \cos(36t)$  models HEIGHT OF  
A BUOY RIDING THE WAVES.

b) FIND HEIGHT AT 35 s.

$$h(35) = \cos(36 \times 35) = -1$$

$\therefore$  AT 35 s THE BUOY IS 1m BELOW SEA LEVEL.

c) FIND TIME TO FIRST REACH HEIGHT OF  $-0.8$  m

$$-0.8 = \cos(36t)$$

$$\cos^{-1}(-0.8) = 36t$$

$$143.13 = 36t$$

$$\therefore 3.98 = t \approx 4s$$

d) DEVELOP AN EQUATION THAT GIVES ALL TIMES WHEN  $h(t) = -1$

$$t = \{4, 6\} + 10n, n \in \mathbb{I}$$
